

Ballast Water- Compliance Support System (BW-CSS)

PERSONAL

The Personal version is for individuals that need to be knowledgeable or proficient in BW regulations. This package provides over 30 titles in seven sections, with 14 quiz assessments, over 70 questions in multiple formats, and constant updates. The lesson plan incorporates materials (from over 25 sources), compiled by practicing maritime professionals in many disciplines: Master Mariner, ship's crew, USCG Vessel inspector, Class Society, Harbourmaster and Port State Control, and BW treatment system suppliers.

PERSONAL version Lesson Plan Includes:

- BW Crew Job Description
- BW Officer Job Description
- BW Regulations Overview
- IMO vs USCG BW Regulations
- BW Treatment Process Overview
- Training on proper completion of a BW Reporting Form
- Overview of BW Management Plans
- Explanation of BW Compliance, Monitoring, and Enforcement
- Description of PSC Vessel Inspection process for BW regulations
- Course Tracker and Progress Report
- Exams, Quizzes, Certifications, and Re-certifications
- "Ask Any Question" capability

Recommended completion time for materials: 2-3 weeks

Approximate completion time (varies with prior experience): 5 to 13 hours

Certification of Completion (printed or filed)

Accreditation by authorized authorities (if accredited, but will be retroactive to all users)

Number of Users: 1 (single individual)

After completion you will be able to answer:

What are the new laws regarding managed ballast water?

What are the changes to ballasting operations as a result?

What are your duties and responsibilities on an ongoing basis?

What are the consequences of not doing things right?

Delivery Modes for Personal BW Training Include all of the following:
